

Plugins

Device Action Data Provider

Device Action Data Provider

Plugin for receiving dial and key action events from the device currently displaying the widget.

Overview

- **Module name:** `widgetbuilder.deviceactionprovider`
- **Plugin name:** `DeviceAction`
- **Version:** `1.0`

Manifest entry:

```
"required_plugins": [  
  "widgetbuilder.deviceactionprovider:DeviceAction:1.0"  
]
```

Runtime objects:

- Initialization flag: `pluginDeviceactionprovider_initialized`
- Initialization callback map: `pluginDeviceactionproviderEvents = { "onInitialized": onDeviceactionproviderInitialized }`
- Plugin access: `window.plugins.Deviceactionprovider`

Methods

`initDevice(deviceId)`

Subscribes to dial and key action events for the specified device. Call this once during plugin initialization, passing the `device.deviceId` value provided by iCUE.

Subsequent calls for the same provider instance are ignored.

Parameter	Type	Description
deviceId	string	Device identifier provided by <code>device.deviceId</code>

Signals

dialTriggered(actionType, dialIndex)

Emitted when a dial or key on the device produces an action.

Parameter	Type	Description
actionType	string	Type of action (see table below)
dialIndex	int	Zero-based index of the dial or key

 NOTE

This signal is emitted only on a real device. It is not emitted in preview mode.

Action types

Value	Description
"press"	Dial or key pressed or released
"long-press"	Dial or key held down

Example

manifest.json

```
"required_plugins": [
```

```
"widgetbuilder.deviceactionprovider:DeviceAction:1.0"  
]
```

index.html

```
function onDialTriggered(actionType, dialIndex) {  
    console.log("Action:", actionType, "Dial:", dialIndex);  
}  
  
pluginDeviceactionproviderEvents = {  
    "onInitialized": function () {  
        if (!window.plugins || !window.plugins.Deviceactionprovider) {  
            return;  
        }  
  
        window.plugins.Deviceactionprovider.initDevice(device.deviceId);  
  
        window.plugins.Deviceactionprovider.dialTriggered.connect(onDialTriggered);  
    }  
};  
  
if (typeof pluginDeviceactionprovider_initialized !== "undefined" &&  
pluginDeviceactionprovider_initialized) {  
    pluginDeviceactionproviderEvents.onInitialized();  
}
```
