

Plugins

[Link Data Provider](#)

Link Provider

Plugin for opening links in the system browser.

If you open a link with standard JavaScript APIs, it opens inside the widget web view.

Use this plugin to open the link in the system's default browser instead.

Overview

- Module name: `widgetbuilder.linkprovider`
- Plugin name: `Url`
- Version: `1.0`

Manifest entry:

```
"required_plugins": [  
  "widgetbuilder.linkprovider:Url:1.0"  
]
```

Methods

`open(link)`

Opens a link in the system browser.

Parameter	Type	Description
<code>link</code>	<code>string</code>	Link to open

Example

manifest.json

```
"required_plugins": [  
  "widgetbuilder.linkprovider.Url:1.0"  
]
```

index.html

```
function openLink(url) {  
  if (window.plugins && window.plugins.Linkprovider &&  
      pluginLinkprovider_initialized) {  
    window.plugins.Linkprovider.open(url);  
  } else {  
    // Fallback for browser testing outside iCUE  
    window.open(url, '_blank');  
  }  
}  
  
openLink("https://www.corsair.com/ww/en");
```
